Standard and Optional Upgrades

Security

- One of 3 media slots feeds a 44 cubic inch capacity **Drop Safe** * with a locking cover to thwart theft. The Drop Safe is **standard** on every drawer with slots and blends in with the inner drawer, effectively hiding it from view.
- The Advantage Cash Drawer's **Standard 3 position 4 function Lock** is available keyed alike or randomly. Master keys are also available.
- **The High Security option** adds an extra measure of protection with 2 keys. The Operator Key can ONLY unlock the cash drawer for electronic use while the Manager Key can also open the cash drawer manually providing an additional level of Loss Prevention protection.
- **The Maximum Security option** provides a 7-Pin, 4-Position Lock that is nearly pick-proof with a heavy-duty cast steel nickel plated shell and tubular key.

Legacy Till Conversion Kits *

The Advantage series offers an optional Till Conversion Kit that allows Advantage Cash Drawers to accept most legacy tills. This enables retailers to continue using their existing tills without disruption as they seamlessly integrate the Advantage Cash Drawers into their system.

This ability to continue using legacy tills is just one of the ways the Advantage Cash Drawer adapts to retailer needs and helps to improve their bottom line.

Ball Bearing Slides

Optional high precision 32 ball bearing slides provide a smooth and full extension for easy entry/exit of the inner drawer.
