

## TSP700II Series - Be Struck By Its Power!

50% faster speed, higher print resolution for graphics, 50% longer print head life, 100% longer autocutter life and an even sleeker look - That's the TSP700II from Star Micronics.

Building on the industry success of the TSP700 from Star Micronics, with a print speed of 48 receipts per minute (250mm/sec), the TSP700II is the best single station printer you can expect. The TSP700II now features a double resolution mode to increase sharpness to any graphic! Eye catching graphics for company logos and/or coupons are a print away.

Its improved and sleeker design features a new top cover which extends to the edge of the printer making it more difficult for dust and liquids to penetrate and harm the printer. In addition to the extended cover, sound and vibration dampening channels within the printer help reduce printing noise and also add an extra layer of protection from moisture or dust when used in harsher environments.

The TSP700II ships complete with interface cover, wall mount kit, power switch cover, start-up roll of paper and a Driver CD.

The TSP700II is ideal for high-volume retail establishments like lottery, grocery stores, healthcare, banking, and restaurants.

To prove Star's full confidence in this ultra reliable printer, Star is offering the best warranty in the industry: a complimentary three year Extend-A-Star bumper to bumper warranty.
