

When Do You Typically Replace Your Batteries?
When they stop working! And by that time, you've already encountered expensive downtime, workflow disruption, and general aggravation. Zebra's new Battery Refresh Program takes away the headaches involved in tracking, testing and replacing the batteries for your Zebra Mobile printers. Prepare for your battery replacements now, and pre-schedule your next shipment at a 15% discount.

Zebra Battery Refresh Program

Improve uptime and optimize performance of your mobile printing system

Why Is It Important to Replace Your Batteries?

All batteries have a limited life and need to be replaced on a regular basis. After a lithium ion battery has exceeded its useful life, it will not retain the same performance characteristics and safety margins. Whether you're a typical user or a power user, Zebra recommends you replace your lithium ion batteries at least once a year.

What Is The Program and Why Should I Be Interested?

The Battery Refresh Program is a new service designed to automatically send out NEW Zebra lithium ion batteries on an annual basis. Simply fill out the enrollment form and provide a purchase order with the desired ship date. Zebra will automatically send replacement batteries on the specified date, and invoice at that time. After you receive your new batteries, send the old ones in for proper disposal and recycling. This program eliminates the hassle of replacing your batteries as they get old and exceed their useful life. Zebra does it for you – automatically!

Program Benefits

- 15% cost savings on battery expense
- Automatic replacement of batteries
- Reduced risks associated with batteries outside their recommended useful life
- Protection against price increases
- Improved efficiency and optimal printer performance

Customized Agreements Available

If you are a power user of mobile printers, you may need to replace your batteries more frequently. Zebra can customize this program to meet your specific requirements.
