- 3-position key lock

CR1000

Standard Form Factor Cash

The compact CR1000 cash drawer enables efficient use of counterspace. To ensure high reliability, the CR1000 is made with an all-metal frame and is reinforced with metal beams to support heavy top loads. The unit uses ball bearing slides, normally found only in expensive cash drawers, for smooth and long-lasting operation. The wide media slot allows insertion of unfolded checks horizontally. With efficient use of internal space, the till is almost the same size as those found in larger drawers.
