

MS7180 OrbitCG

Omnidirectional Laser Scanner

Honeywell's MS7180 OrbitCG® provides a stylish solution for omnidirectional and menu-scanning applications where counter space is at a premium.

OrbitCG combines the power of patented CodeGate® technology with many of the outstanding features already found in the MS7120 Orbit®—the all-time, best-selling small omnidirectional hands-free scanner.

CodeGate technology allows the user to easily target the desired bar code and complete data transmission with the push of a single button, making OrbitCG ideal for targeted or menu scanning applications.

This innovative, elegant and affordable solution to convenience retail applications also safeguards long-term infrastructure commitments.

In the event of a change in POS system or software, OrbitCG easily updates firmware via its patented MetroSet®2 configuration software—provided free by Honeywell. Use either a USB or RS232 interface to perform configuration updates.

Based on the original MS7120 Orbit's award-winning design, OrbitCG's shape enables hand-held scanning of large, bulky items. For added flexibility, the scanning head can be tilted within a 30° range to accommodate objects of various sizes and shapes.

Standard features include an EAS antenna integration for tag deactivation, power save mode, data editing, OPOS/JPOS compatibility for easy installation and user-replaceable cables.
