Intelligent Industrial Thermal Printer ▪ ▪ ▪

features at a glance ▪ ▪ ▪

- **Near Edge Printhead** - allows full use of the label giving customers the ability to design and code barcodes that support detailed information. The flexible multimedia printing allows labels to be printed on synthetics, tags, self-adhesives and plastics.

- **PCL5e & PCL6 Standard Language** - makes graphics integration easier and allows users to spend less time setting up printers. Offers virtually endless application choices.

- **Easy ERP integration** - a benefit that derives from true PCL5e & PCL6 thermal barcode printers. Middleware applications are no longer necessary within printer networks. All Performance printers are approved through the SAP® Printer Vendor Program.

- **Laser and inkjet printer** - users can realize the benefits of a ruggedized thermal barcode printer and reduce operating costs with seamless integration of true PCL5e & PCL6 devices.

- **Media auto-loading and calibration** - to give printer operators freedom from complex and time consuming media setup.

- **Graphic color touchscreen** - display with an intuitive menu flow making the user interface and navigation seamless.

- **Die cast frame** - and metal covers designed specifically for harsh work environments.

- **Standard 300 dpi printhead** - with each Performance Series printer allows users to now benefit from a higher resolution printhead with better text, images and barcodes at a 203 dpi printhead price.

- **50 resident scalable fonts** - is the new standard in thermal barcode printing. No longer restricted to a limited font selection, users can create custom labels on-demand.

The Datamax-O'Neil p1120n Near Edge Performance Printer offers a unique near-edge printhead that allows full use of the label giving customers the ability to design and code barcodes that support detailed information. The flexible multimedia printing allows labels to be printed on synthetics, tags, self-adhesives and plastics. The near-edge printhead gives users the ability to integrate barcode printing across a wide variety of applications. The p1120n also offers auto-loading capabilities, a user-friendly touchscreen, and uses industry standard PCL printer language making it easy to integrate.

Like the rest of the Performance Series printers, the p1120n was designed to resolve a number of issues customers have been having with thermal printers for many years. This had resulted in a printer family that is the easiest to load, easiest to use and easiest to integrate of any thermal printers available anywhere. The inclusion of Incorporating PCL, an industry standard printer language, allows the printer to run on a variety of operating systems, so it is independent of any application software running on a computer. This ensures faster and easier plug-play integration, getting your printer systems up and running sooner.
